

2016

Iran Special Operation Tour

Iran Special Operations Tour 2016 is designed to simulate military transport operations in Iran.

List of Callsigns approved:

PYA	POUYA AIR LINES	Cargo (Revolutionary Guard Air Force)
IRF	Iran AirForce	Islamic Republic of Iran Air Force (IRIAF)
SEP	SEPAH	Revolutionary Guard Air Force

Types used:

- Boeing 707 , Boeing 747-100/200 , Ilyushin IL-76 , C-130 , AN-74 , Fokker27

General Rules and Regulations:

- All legs MUST be flown online
- All legs MUST be flown in the real weather conditions
- All legs MUST be flown in Realtime mode (1x SimRate)
- Using supersonic aircraft is forbidden
- We will not validate any leg performed with DIRECT GPS. This procedure is not in the spirit of our tour. In order to find a point or any other element that may be useful to the navigation, the use of GPS or any other navaid is allowed
- A MAXIMUM disconnection time of 10 minutes in total due to PC or Flight Simulator crash is accepted (You must mention the correct times of disconnection and reconnection in UTC)
- Please pay attention to your flight plans. Flights with wrong departure/arrival ICAO codes or wrong flight rules, will not be accepted and have to be flown again
- Report the departure/arrival times in UTC and 24 hours system
- MAXIMUM allowed Flight Level is FL400
- Please include "RMK/IRSO16 LegXX" (replace XX with the leg number) in your flight plan's additional information section

Award:

All pilots who successfully complete this tour will be awarded Iran Division Special Operations Tour badge.
